CATALOGUE 2026

INTRUDER ALARM TECHNOLOGY

Certified hybrid, wireless and wired alarm systems for private and commercial properties. Easy to use at the door and via app, plus efficient system management, remote maintenance and even more.

In our latest catalogue, we are presenting the
20256 intruder alarm technology range from ABUS Security Center.
Detailed information for all products can be found at **abus.com**

SECURITY SINCE 1924

ABUS Security Center belongs to the ABUS Group and is part of the well-known global security brand.

The ABUS Group and its subsidiaries have stood for comprehensive security since 1924. As a traditional company with many years of experience, ABUS continues to set new standards and trends in the field of innovative security technology – with a particular focus on the smart interplay between electronics and mechanics.

High-quality security solutions are the result of the interplay of various factors such as hardware and software, service and advice – and the fusion of separate technologies into a comprehensive networked solution.

ABUS Security Center brings this philosophy of integrated security solutions to life with its products. And by doing so, it pursues the goal of making the everyday lives of its customers and users extra secure and comfortable.

ABUS | Security Center
Alarm systems, video surveillance, door intercom systems, electronic locking systems, digital access control

ABUS | August Bremicker Söhne
Home security, property security, mobile security

ABUS | Pfaffenhain
Mechanical locking systems and master key systems

OVERVIEW

ABUS INTRUDER ALARM SYSTEMS

COMFION PRO | WIRELESS ALARM

- Ideal for single-family homes, flats and small businesses
- Up to 160 wireless components & 4 wired detectors can be integrated directly
- Access control natively integrated
- Video verification, integrated NVR and smart home automation

EN 50131

2

COMFION | WIRELESS ALARM

- Ideal for detached houses, flats & small businesses
- 100% wireless, with encrypted radio transmission (1,000 m free field)
- Video verification, integrated NVR & smart home automation
- App operation, emergency call and service centre protocol, OTA updates

EN 50131

2

VSÖ

SECVEST | WIRELESS ALARM

- Ideal for detached houses
- All-round protection & active break-in protection
- Video verification (ABUS cameras)
- App operation, emergency call and service centre (ARC) protocols

VdS Home

EN 50131

2

SECORIS | HYBRID ALARM

- Ideal for commercial properties & office complexes
- App operation & encrypted Secoris Wireless
- High genuine alarm precision & forced access
- Simple installation & remote maintenance (system bus, OTA update)

VSÖ

SES

CERTIFICATIONS

The VdS damage prevention is the leading institute for corporate security within the German Insurance Association. VdS home sets the standard for alarm systems in the private sector.

The Association of Security Companies in Austria (VSÖ) checks compliance with international norms and quality standards and defines guidelines for high-quality burglar alarm systems.

The Swiss Security Systems Installers Association (SES) brings together leading Swiss security companies that meet strict standards and are recognised.

The EN 50131 standard defines the security level of burglar alarm systems using radio frequency technology. It offers protection against experienced burglars with special tools – ideal for private households.

Alarm panels with EN Grade 3 offer increased protection against highly experienced burglars with comprehensive tools, including electronic devices. Relevant for commercial properties, often in accordance with property insurance requirements.

**hybrid: Integration/extension of wired/wireless detector groups using extension modules

Professional security system with integrated video recording and access control – arm/disarm directly at the door, plus intuitive smart home features.

COMFION PRO

WIRELESS ALARM

The ABUS Comfion Pro wireless security system combines an alarm panel, electronic access control and smart home functions in a single system – making it ideal for installations in private and small commercial environments. The native integration of wAppLoxx Pro enables direct arming/disarming at the door and reduces false alarms.

MAIN FEATURES AT A GLANCE:

All-in-one solution: alarm system, video NVR (up to 8 cameras) and access control in one system.

Native wAppLoxx Pro integration: direct arming/disarming at the door – fewer false alarms, user-friendly for end customers.

Perimeter warning with external components: early detection of intruders.

Integrated video network recorder: central recording and management for up to 8 cameras, no additional NVR required.

App-based operation & smart home scenarios: centralised management of all components, versatile configuration of scenarios – ideal for individual customer requirements.

Scalable and project-oriented: up to 160 wireless components and 40 zones – high wireless range of up to 2,600 m in open space, enabling you to efficiently plan everything from small properties to larger projects.

Integrated mobile phone module for redundant data and voice communication

EN 50131 Grade 2: suitable for insurance-related security requirements and professional projects.

OVERVIEW
COMFION PRO

SECURITY RIGHT AT THE DOOR

With wAppLoxx Pro, you can offer your customers an integrated electronic access control system which works directly with the Comfion Pro security system. Doors can be conveniently armed and disarmed, preventing false alarms. For your customers, this means maximum reliability and maximum ease of use. At the same time, resellers benefit from simple installation and centralised system control, which speeds up installation and reduces service costs – a strong selling point for professional security solutions.

INTEGRATED NETWORK VIDEO RECORDER

The integrated NVR centrally manages and records up to 8 cameras in the system. For your customers, this means full control over all video images in one place, without additional devices. In the event of an alarm, the video images are displayed directly in the app so that end customers can immediately see what is happening – a clear added value for security-conscious households and businesses.

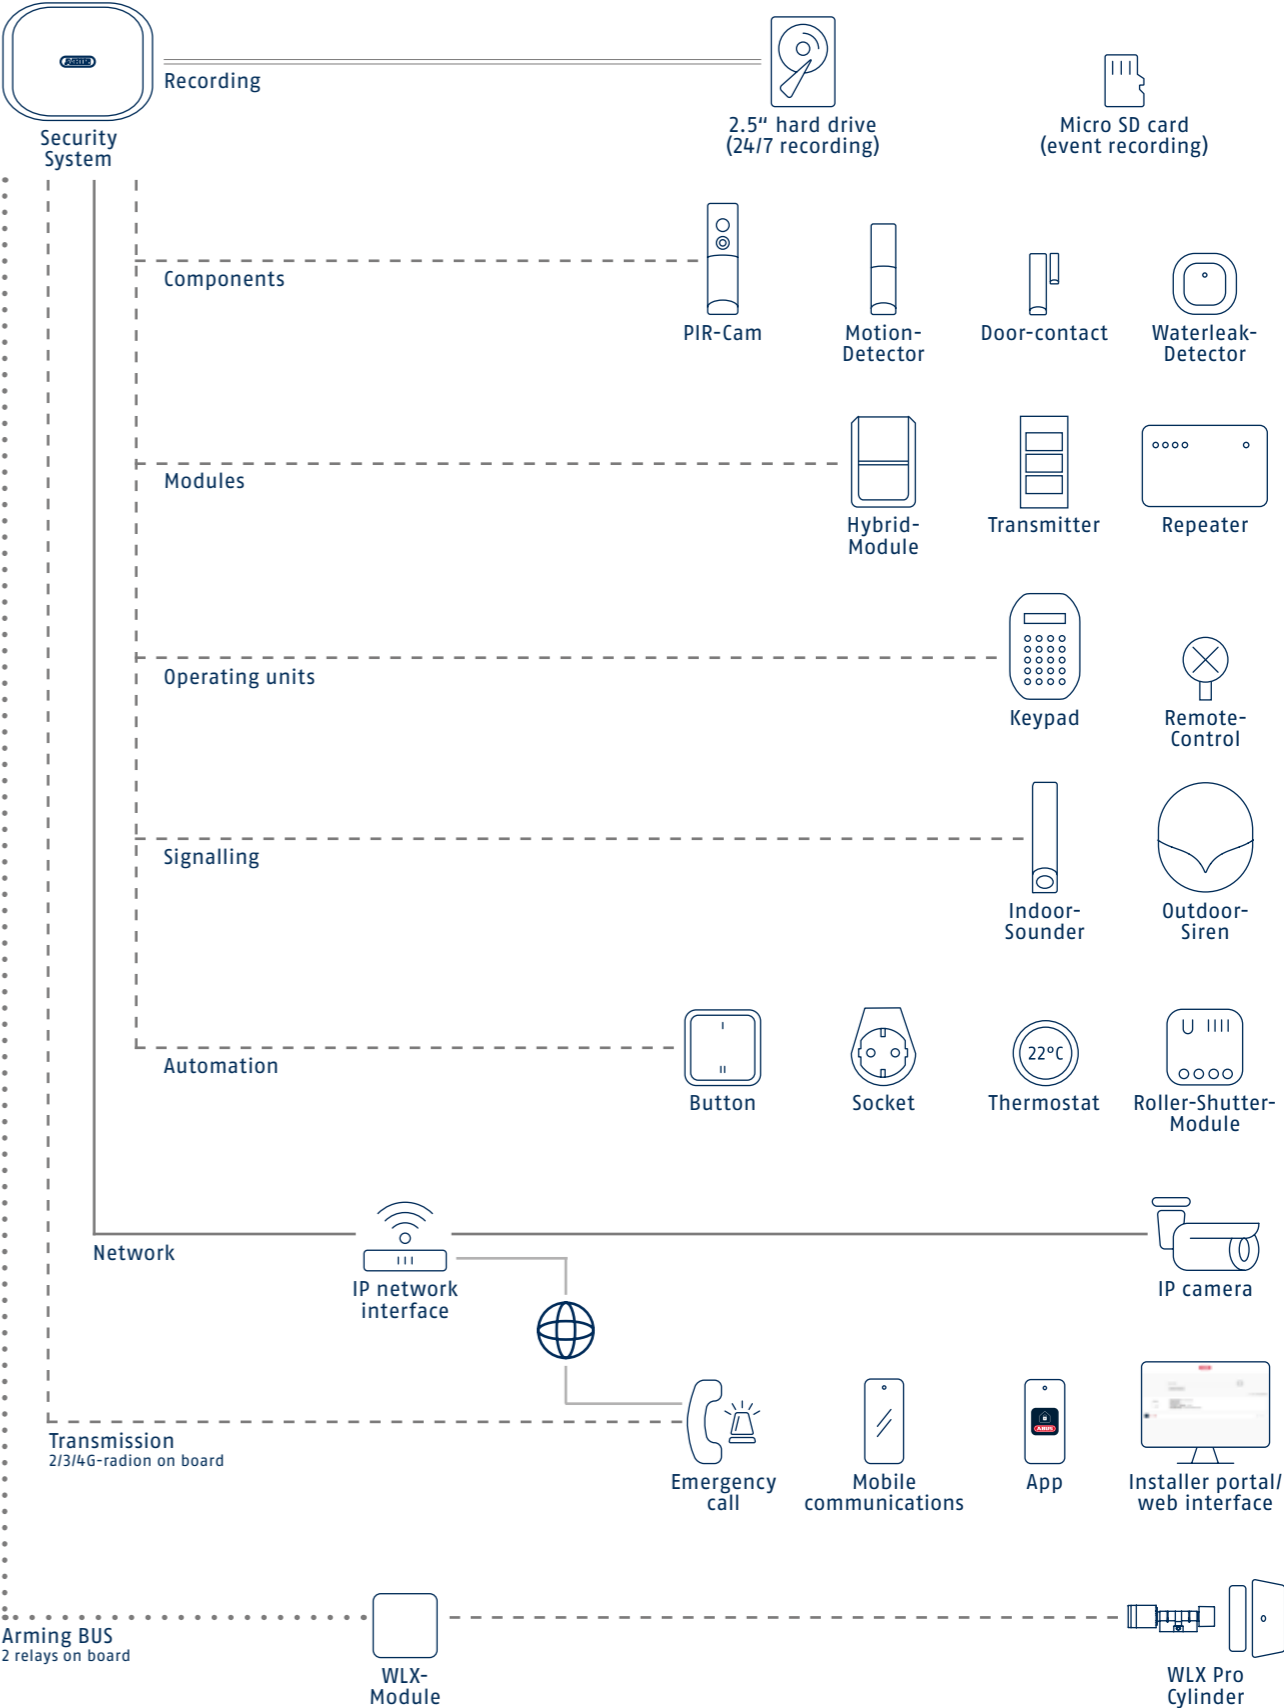

ABUS IP CAMERA COMPATIBILITY:

Table with 2 columns: Part number, Description. Lists various IP camera models and their specifications.

Table with 2 columns: Part number, Description. Lists various IP camera models and their specifications.

Description	Comfion Pro Demo Case (not equipped)
	<ul style="list-style-type: none">• Sample case for the professional demonstration of Comfion Pro at the customer• The elegant case impresses with its simple elegance and enhances your Comfion Pro product presentation, while the products are well protected during transport thanks to the black foam inlay.• The following products are intended for the case and must be ordered separately: FUAA85000, FUBE80100, FUMK80000, FUBW80200, FURM80000, BUM080000, 512173
Dimensions (W × H × D)	460 x 320 x 105 mm
Scope of delivery	1 x Sample case Comfion Pro (unequipped)
Required accessories	FUBW80200 Comfion Wireless-PIR-Cam • BUM080000 Comfion Pro BUS-WLX module • FURM80000 Comfion wireless smoke detector • FUBE80100 Comfion wireless keypad Mifare DESFire

SECVEST

WIRELESS ALARM

Reassuring for residents or staff: Reliable technology ensures your personal safety around the clock.

Not only with all-round protection from burglary, fire and water damage and in case of emergency: in combination with mechatronic ABUS window/door locks, the Secvest is the only wireless alarm system that actively protects against the risk of burglary. Conclusion: The perpetrator is detected or driven away before they make it into the building. The privacy of the residents - sometimes the most important factor affected by a burglary - remains completely unviolated.

A clear advantage of wireless technology: The alarm system can be installed in just a few hours - without pulling cables, possibly knocking open the walls and the associated dirt. By integrating additional components, you can expand the system scope as required, e.g. add wired detectors, attach opening detectors integrated into the window on site or wireless door cylinders. Should you move house, the Secvest and its components can be dismantled at any time and reinstalled in your new home, office or business.

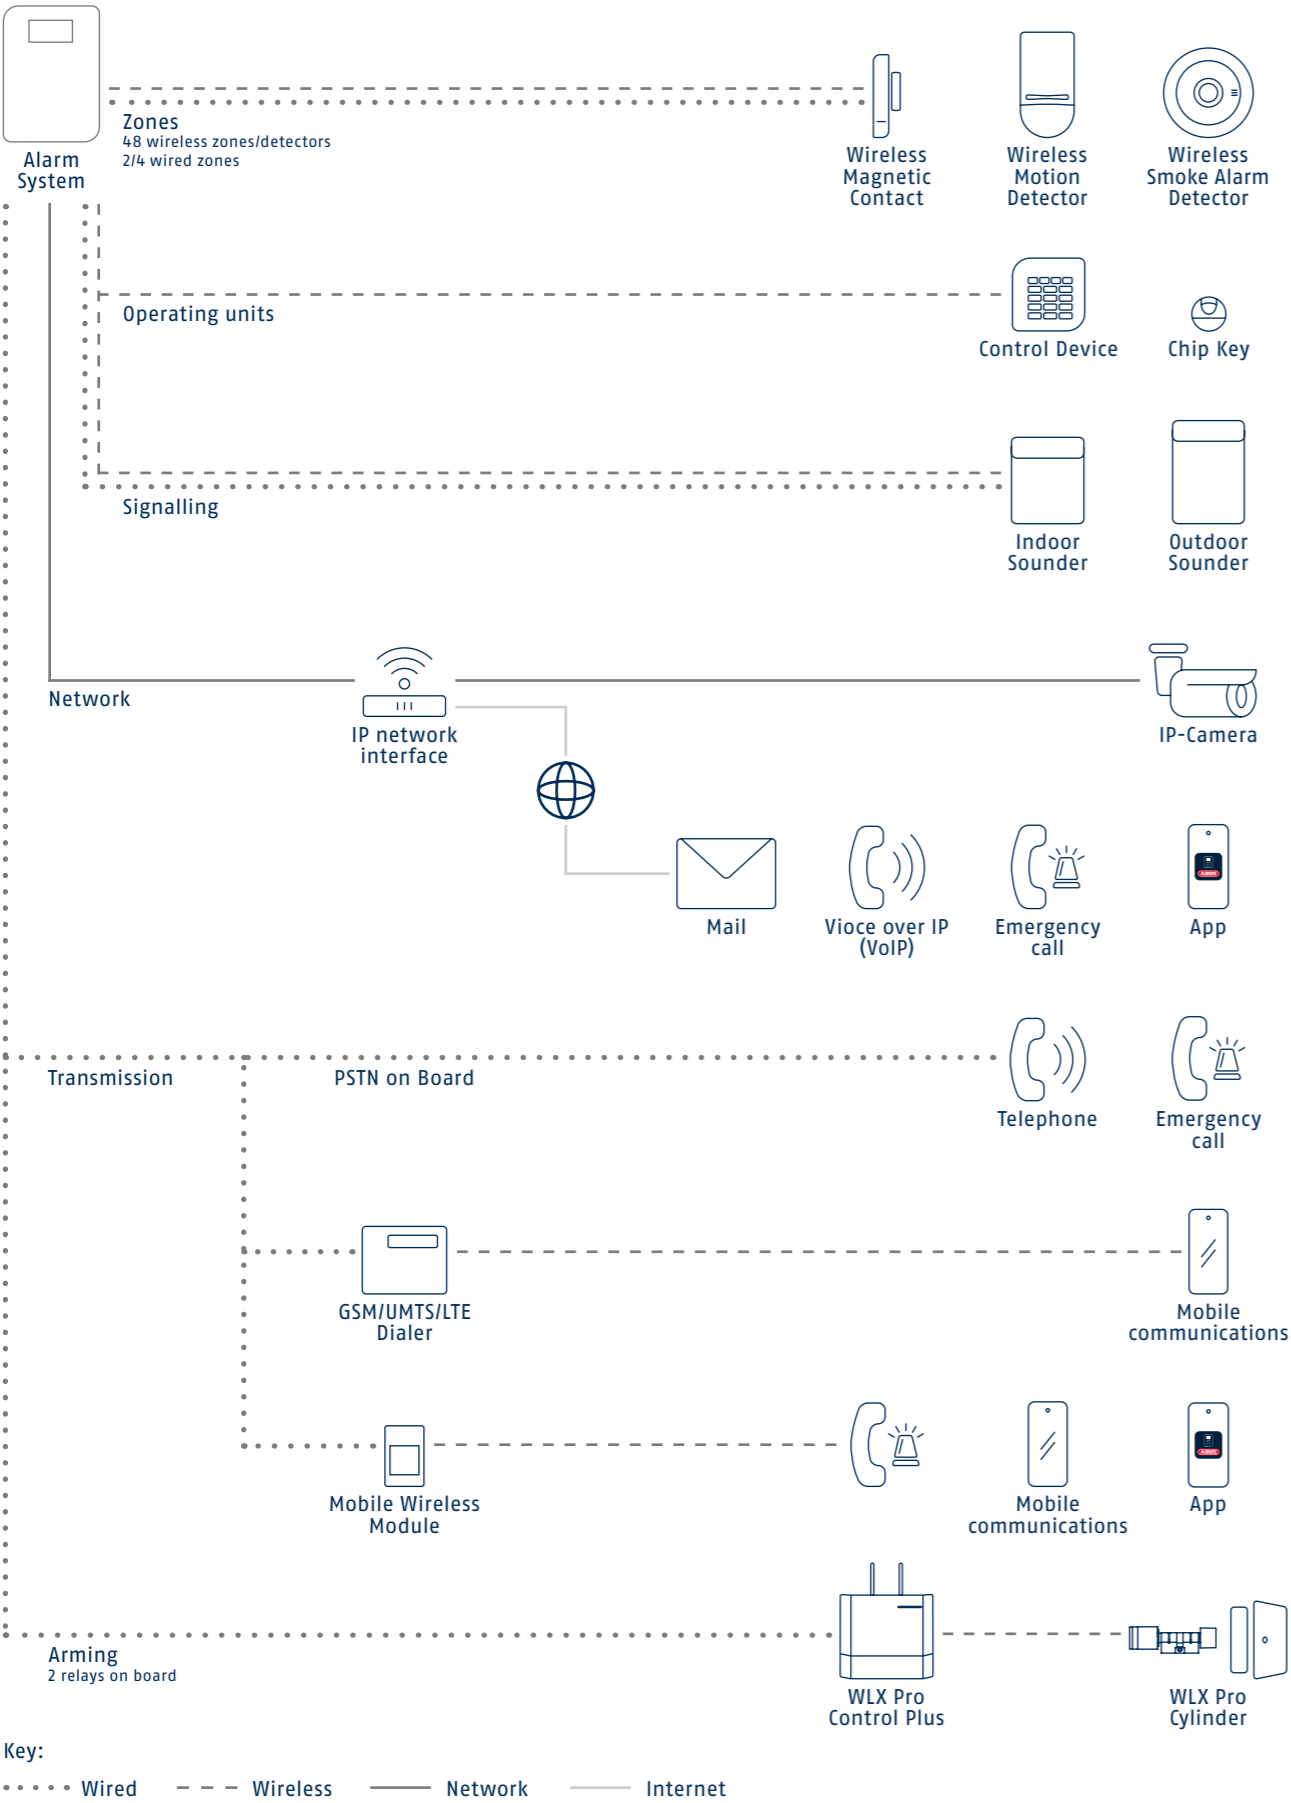

The operating convenience of the Secvest also speaks for itself: Whether with the app on the smartphone (including push notifications in the event of an alarm), with the handy remote control on the key ring, on the keypad or directly by unlocking and locking the front door on the WLX wireless cylinder.

KEY ADVANTAGES AT A GLANCE:

- Up to 48 individually identifiable radio detectors (radio zones), 8 keypads, 50 remote controls
- Convenient operation and programming on the panel and web server
- Fast configuration and diagnostics through software features via the panel and web server
- Active burglary protection with additional mechatronic wireless window/door security devices
- Video verification with up to 6 ABUS network cameras
- Send IP-based protocols to alarm receiving centres (e.g. security firm)
- VdS Home certified and EN 50131 Grade 2

The original: ABUS Secvest is a proven hybrid alarm system that offers comprehensive, active break-in protection.

SYSTEM DESIGN

SECVEST WIRELESS ALARM

Item number FUA50500

Description	Secvest Touch Wireless Alarm System
	<ul style="list-style-type: none">• Proven all-round security in a new, elegant design• Modern touchscreen interface with capacitive buttons• Integrated light sensor that dynamically adjusts the backlighting• Secvest components are easy to configure using the alarm control panel and the software features on the integrated web server, which saves time• Integration of electronic access control systems• Video verification via the app with up to 6 ABUS IP cameras• Active intrusion protection due to the combination with additional mechatronic wireless window/door locks• Up to 48 individually identifiable wireless detectors, 4 wired detectors, 8 control panels, 50 remote controls• Integrated PSTN dialler, monitoring station protocols (also IP-based) and email notification• VdS Home certified and EN 50131-1 Level 2
Number of wireless zones	48
Number of wired zones	2 x CC or 4 x FSL
Number of virtual IP zones	6
Sub-areas/monitoring areas	4
Max. number of control units	8
Number of users	50
Operation	Panel: via Secvest key, wireless remote control, extra wireless door lock, proximity chip key, wireless key switch and wireless control panel / Wireless: via web server, mobile application, telephone
Menu guidance	Voice-activated
Programming	Directly at the alarm control panel or via web server
Remote configuration	Yes
Event memory	Yes
Communication/alarm	Monitoring station, voice, SMS, email, push notification
Protocols	NSL: Fast format, contact ID, SIA (analogue and IP); maintenance: Scancom, Scanfast, Tunstall
Video verification	Yes, in connection with e.g. TVIP41550, IPCB42500, IPCB42501, IPCB62500, IPCB72500, IPCB72501
Connections	230 V AC / 13,8 V DC screw terminal, a/b screw terminal, siren connection, 2-4 wired zones, 2 outputs
Network access	Ethernet
Network protocols	HTTPS
Integrated siren	Yes
Voltage monitoring	Yes
PSU	Integrated or external
Backup power supply	Yes
Environmental class	II
Housing material	ABS
Net weight	1.24 kg
Certifications	VdS Home, EN 50131 Grad 2
Dimensions (W x H x D)	205 x 285 x 46 mm
Scope of delivery	1 x Secvest Touch Wireless Alarm Control Panel • 1 x Quick Guide • 1 x Mounting material • 1 x Backup battery
Recommended accessories	FUBE50001 Secvest Wireless Control Device • FUFT50050W Secvest Wireless Window Handle Lock FO 400 E – AL0089 (white) • AZZU10031 Power Supply 13,8 V/1,74 A (Cord) • ESM050000 Secvest mobile wireless module

Scope of delivery	1 x Power Supply 13,8 V/1,74 A	1 x Battery Pack For Wireless Universal Module

SECORIS

HYBRID ALARM

Many owners, operators and managers of commercial buildings can't rely on just any alarm system. Depending on the type of company and business premises, insurance companies require a certified burglar alarm system according to EN Grade 2 or Grade 3.

Based on this certification, ABUS Secoris implements alarm functions for protection against burglary, fire and water damage and for emergencies. Secoris also wins over its customers with a wide range of additional security functions, such as the addition of electronic wireless locking cylinders (WLX Pro + WLX Pro Plus access control). In this way, the administrator or operator keeps an eye on all access points and movements in the building. And users have optimal protection against triggering false alarms by entering secured areas through mandatory arming/disarming directly at the door.

KEY ADVANTAGES AT A GLANCE:

Powerful alarm system, optimal for the commercial sector (businesses, offices, etc.)

Reliable operation, precise alarming and flexible set-up depending on the property and customer's requirements

200 zones*, 50 BUS devices** and flexible operation for 200 users in up to 20 sub-partitions

Flexible operating options on the RFID keypad, external keypad reader and touch control panel

Efficient management, set-up and monitoring of all systems in the installer portal including remote diagnostics and maintenance (e.g. firmware updates)

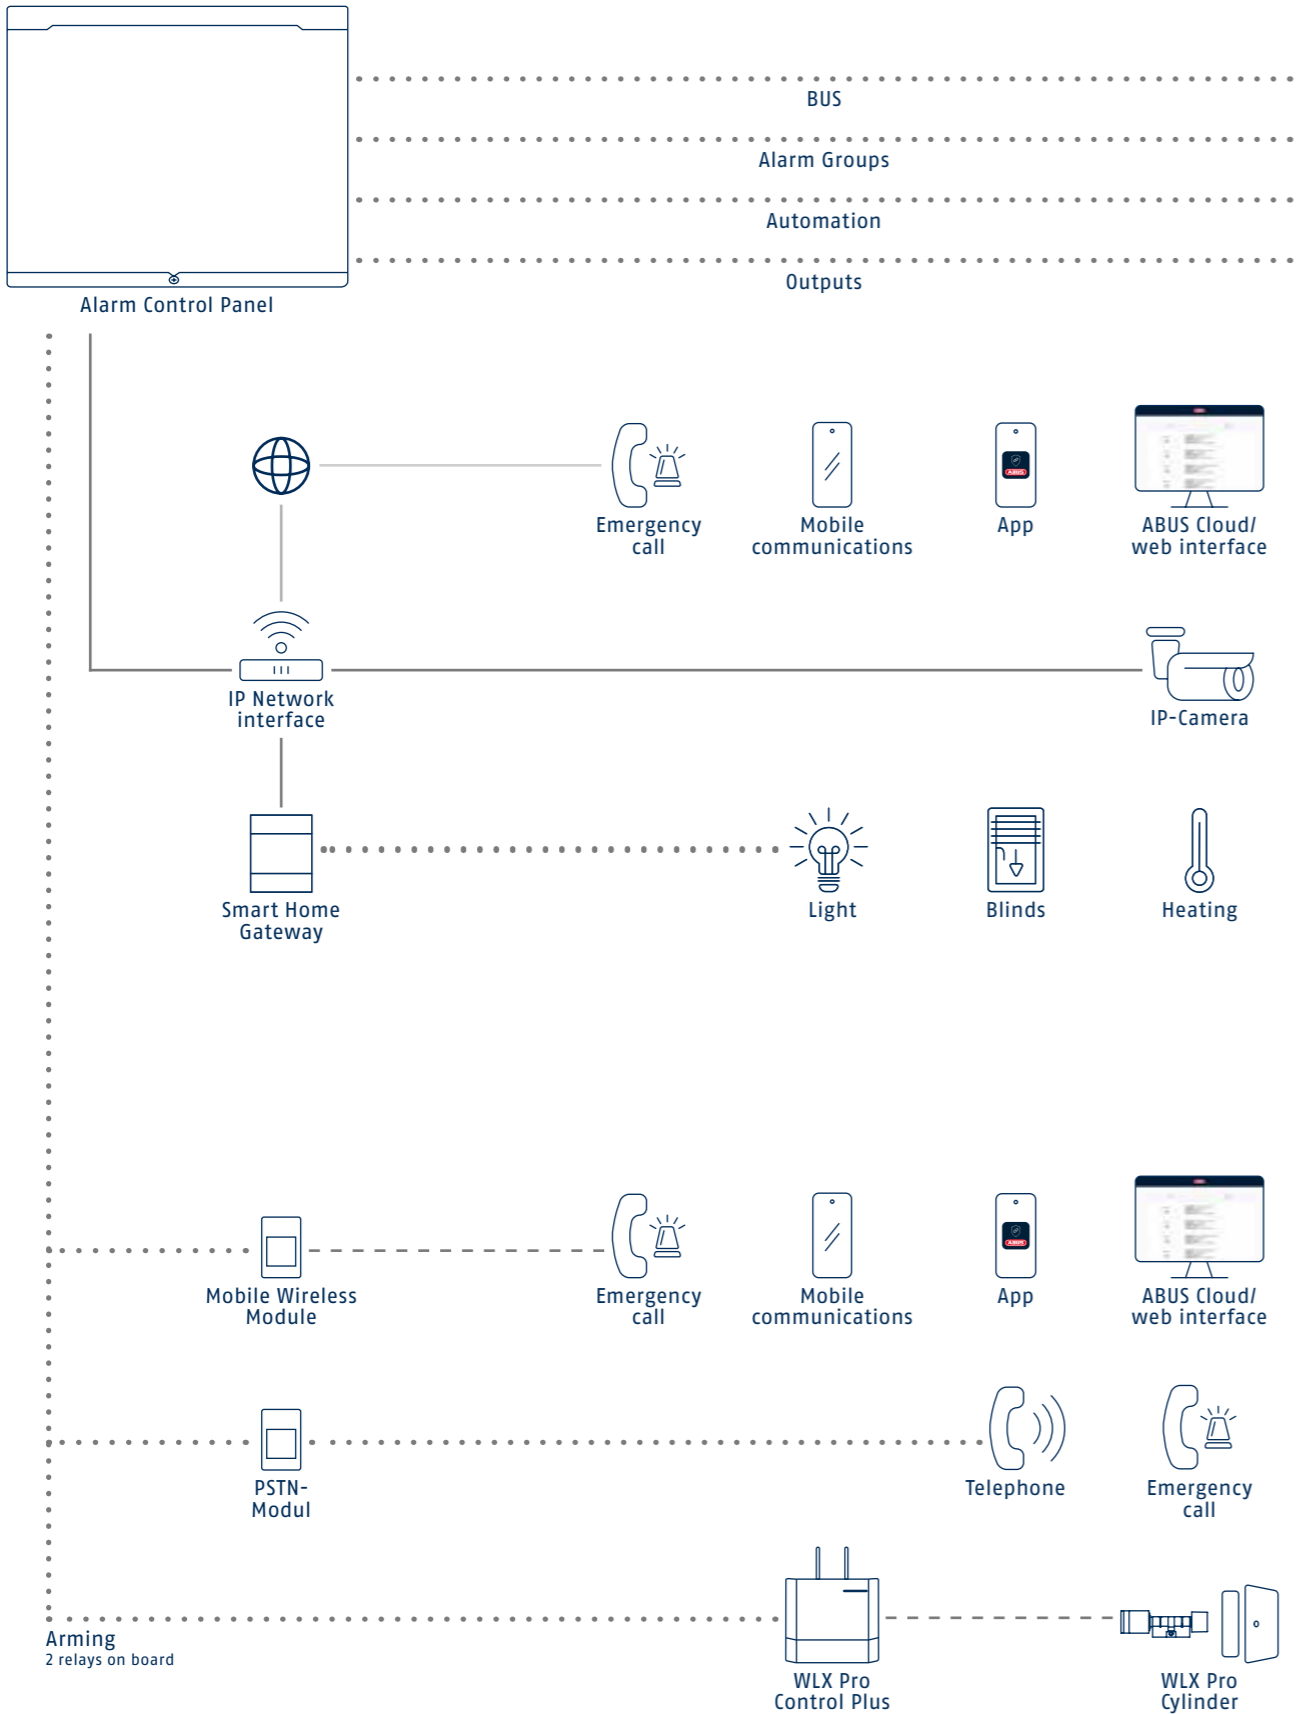

Certified quality according to EN 50131-1 Grade 2 and 3

The certified platform for high-quality break-in protection in companies. Absolutely installation-friendly and low-maintenance thanks to the bus system, remote maintenance and over-the-air updates.

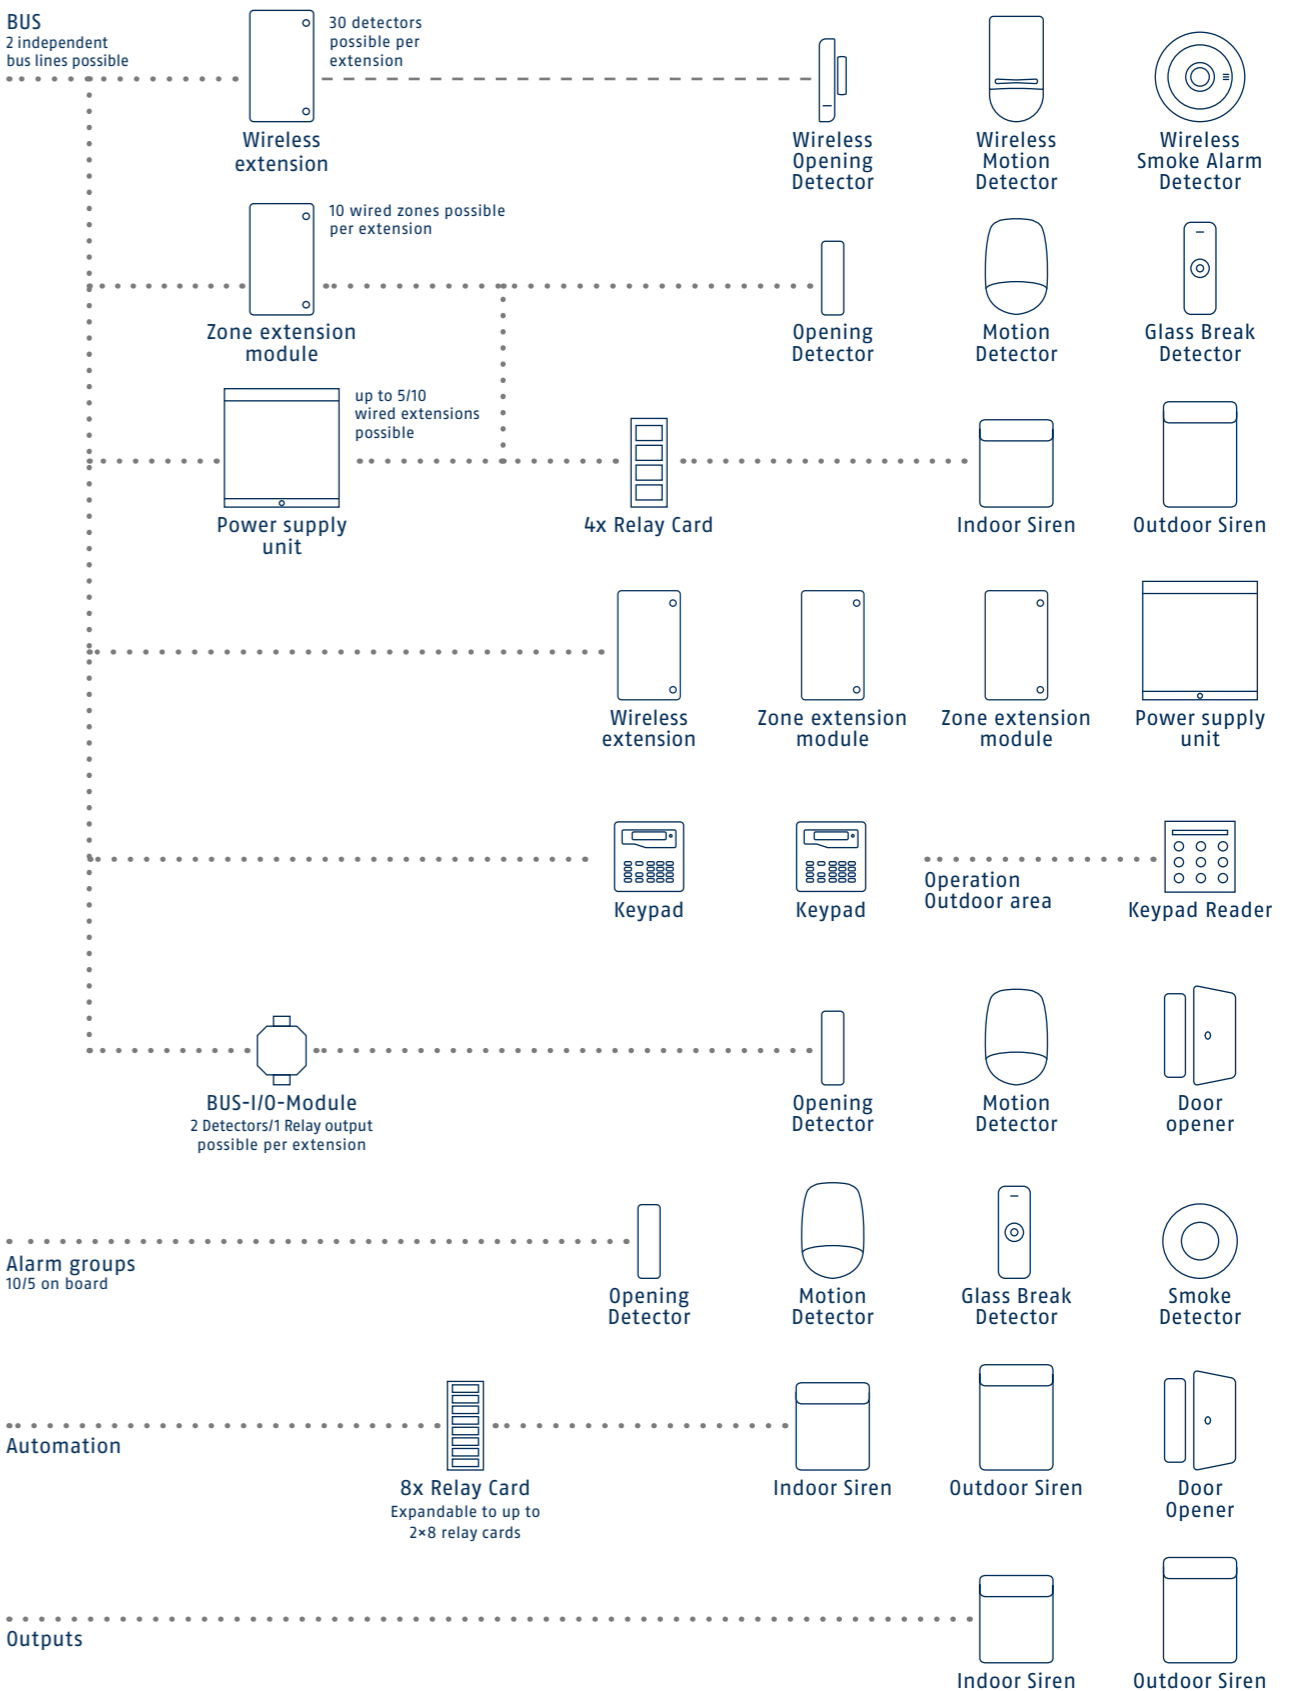

*) individually identifiable **) components as a whole, e.g. control panels, extension modules, etc.

SECORIS HYBRID- ALARM

Item number	ESEZ60500
-------------	-----------

Description	Secoris Alarm Control Panel
	<ul style="list-style-type: none">• Powerful alarm system for professional protection of commercial properties, for reliable operation, precise alarming and flexible setup, ideal in the commercial sector (businesses, offices, etc.), certified quality to EN Grade 2• 200 individually identifiable zones and a total of 50 BUS devices (e.g. keypads, expanders, external power supply) for comprehensive protection, flexible operation for 200 users in up to 20 partitions• Efficient management, set-up and monitoring of all systems in the Installer Portal, incl. remote diagnosis, maintenance (e.g. firmware updates) and connectivity solutions by the installer• Extended administration and service offers via additional packages in the Installer Portal• Alignment of the system to specific requirements in the project/building through flexible configuration, BUS system, optional expanders and connection of the electronic ABUS locking system (WLX Pro/Pro Plus)• Integration of up to 10 ABUS IP cameras for video verification of events (e.g. alarm)• Individual authorisation management for individual user groups• Optional redundancy in control centre communication possible via PSTN or 4G module• Control centre connection via standard integrated control centre protocols possible• Certified to EN 50131-1 Grade 2

Number of wired detector groups	10
Max. number of detector groups	200
Number of BUS lines	2
Max. number of BUS components	50
Expandable (hybrid)	Yes
Max. number of control units	49
Sub-areas/monitoring areas	20
Zone closure	CC/FSL
Number of users	200
Number of events	3000
Event memory	Yes
Communication/alarm	ARC, SMS, E-Mail, Push-messaging
Programming 1	Keypad, Web Server, Cloud, App
Remote configuration	Yes
Integrated siren	No
Outputs	200 plus 16 communicators
Relay outputs	2
Switching outputs	2
Network protocols	HTTPS
Power consumption	240 mA
Backup power supply	Yes
Emergency battery	12 V 7 Ah
Installation location	surface-mounted
Environmental class	II
Certifications	EN 50131 Grade 2, VSÖ GS-N
Housing material	Metal
Net weight	4.5 kg
Dimensions (W × H × D)	402 x 320 x 102 mm
Scope of delivery	1 x Secoris burglar alarm system control panel
Required accessories	BUBE60000 Secoris keypad • BT2070 VdS Battery, 12 V, 7.2 Ah • BUBE60020 Secoris BUS keypad with RFID reader (Mifare Desfire)
Recommended accessories	AZBW10220 Motion detector PIR MW Xtra-Flex EN3 • AZ6500 VdS Surface Mount Panic Alarm Button • MK1010B Opening Detector, 4 m, 4-core (brown) • BUM060100 Secoris BUS external power supply unit

Item number	ESEZ70500
-------------	-----------

Description	Secoris Alarm Control Panel EN Grade 3
	<ul style="list-style-type: none">• Hybrid-capable intrusion alarm system for professional protection of commercial properties, reliable operation, precise alerting and flexible setup, ideal in the commercial sector (businesses, offices, etc.), certified quality according to EN Grade 3• 200 individually identifiable zones and a total of 50 BUS components (e.g. keypads, extension modules, external power supply) for comprehensive protection, flexible operation for 200 users in up to 20 sub-areas• Efficient online management, set-up and monitoring of all systems in the web installer portal, incl. remote diagnosis, maintenance (e.g. firmware updates) and connectivity solutions by the installation company (ABUS specialist partner)• Extended management and offer of extra services by the ABUS specialist partner after activation of additional packages in the web installer portal• System customisation to specific requirements in the project/building through flexible configuration, BUS system, optional expansion modules (wire/wireless), forced operation and connection of the electronic ABUS key system (WLX Pro/Pro Plus)• Individual authorisation management for individual user groups (installer, admin, user, etc.)• Control centre connection to (emergency call and service control centre) possible via standard integrated control centre protocols• Optional redundancy in control centre communication possible via PSTN or 4G module• Integration of up to 10 ABUS IP security cameras for verification of events (e.g. alarm)• EN 50131 Grade 3 and SES certified

Scope of delivery	1 x Secoris keypad	1 x Secoris BUS Control Panel Prox +
Required accessories	ESEZ60500 Secoris Alarm Control Panel	ESEZ60500 Secoris Alarm Control Panel
Recommended accessories	AZ6361 Alarm Cable, 8-core, 100 m • AZ6362 Alarm Cable, 8-core, 250 m	BUBE60100 Secoris keypad reader with RFID reader (Mifare Desfire) IP54 • FUBE50020 Proximity Chip Key • ACTP00004R ABUS Transponder red MIFARE DESFire EV1 4K (Security) • ACTP00008S ABUS Transponder Advanced black MIFARE DESFire EV3 8K (Security)

Item number	BUBE60100
-------------	-----------

Description	Secoris keypad reader with RFID reader (Mifare Desfire) IP54
	<ul style="list-style-type: none">• Control panel with keypad and RFID reader / proximity reader (Mifare Desfire) for outdoor use• For conveniently arming/disarming the Secoris control panel from outside the building (IP54)• Arm/disarm using a contactless RFID transponder (chip key) or by entering a PIN code• Robust, high-quality design with scratch-resistant surface and convenience keypad, fits perfectly thanks to compact construction (WxH: 81x81 mm) fits flexibly and discreetly into any façade• Readout-protected RFID communication between transponder and keypad reader via Mifare Desfire EV1 possible (also compatible with Mifare Classic)• Immediate feedback / system status signal (coloured status LED, signal tones)• Outdoor keypad reader acts as an extension for the indoor component (item no. BUBE60020), simple connection with only one cable via RS485-BUS (data/signal transmission, power supply)• Tamper-proof connection to the indoor control panel via RS485-BUS (OSDP security standard: secured connection, AES128 encrypted), system logic not accessible from outside• Flexible mounting: exposed or concealed, connection: with spring-loaded or screw terminals• Protection class: IP54

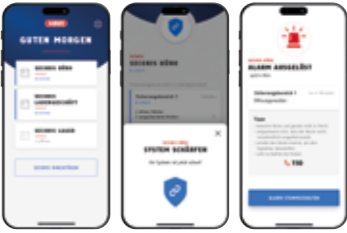

Sabotage monitoring	Yes
Connections	RS485-BUS (OSDP) to be connected to BUBE60020
Integrated siren	-
Switching outputs	-
DC voltage supply	8 - 30 V
Power consumption	140 mA
Max. operating temperature	60 °C
Min. operating temperature	-25 °C
Installation location	flush-mounted (optional surface-mounted incl. Item: AZZU10080)
IP protection class	54
Environmental class	-
Certifications	compliant to EN 50131-1
Housing material	plastic
Dimensions (W × H × D)	81 x 81 x 13.3 mm
Scope of delivery	1 x Secoris keypad reader with RFID reader • 1 x Installation material • 1 x Installation instructions
Required accessories	BUBE60020 Secoris BUS keypad with RFID reader (Mifare Desfire)
Recommended accessories	FUBE50020 Proximity Chip Key • AZZU10060 Weatherproof Housing for Secoris Keypad reader (Flush-mount) • AZZU10070 Weatherproof Housing for Secoris Keypad reader (surface-mount) • AZZU10080 Housing for Secoris Keypad reader (surface-mount)

BUILDING AUTOMATION WITH SMART HOME

ABUS SMART HOME GATEWAY - SECORIS

ONE SYSTEM, MANY POSSIBILITIES: SECORIS INTEGRATES SMART HOME AUTOMATION

The ABUS Smart Home Gateway connects the Secoris alarm panel with Smart Home and brings all the advantages of building automation directly to the alarm system. It enables control via Smart Home Gateway, bidirectional communication and integration of IoT devices such as Alexa and Philips Hue. The interface allows integration into smart home installations so that lighting, blinds and heating can be incorporated. This enables comprehensive control options and automation functions such as presence simulation.

SELECTION OF COMPATIBLE SYSTEMS:

All smart home apps are independent products and have no legal connection to the third-party manufacturers mentioned. Neither ABUS Security Centre nor app developers are owners of the above trademarks.

Item number ESM060020

Description Secoris KNX Package

- Integrates KNX with devices such as Amazon Alexa, Sonos, Philips Hue and FRITZ!Box for a networked building
- Convenient control and management via web application
- Functions as a KNX router and interface for ETS software, saves hardware and simplifies installation via the web server, ETS topology can be imported
- KNX reacts to intruder alarm system events and controls the Secoris system via the KNX system
- Combinable apps offer customised automation and control options
- Numerous apps in the BAB APP MARKET offer customised solutions and regular updates
- KNX Secure is currently not possible

Connections	DC power supply, RJ45 LAN, KNX bus
DC voltage supply	12–32V DC V
Power consumption	300 mA
Max. operating temperature	35 °C
Min. operating temperature	-5 °C
IP protection class	20
Housing material	Plastic
Compatible with	Secoris
Dimensions (W × H × D)	72 x 90 x 63 mm
Scope of delivery	1 x Secoris KNX Package • 1 x APPModule Abus Secoris Edition • 2 x Plug-in screw terminal • 1 x Quickguide
Required accessories	ESE70500 Secoris Alarm Control Panel EN Grade 3 • ESEZ60500 Secoris Alarm Control Panel

Item number	BUM060020
-------------	-----------

Description	Secoris BUS-I/O-Module
-------------	------------------------

- Extension module for the Secoris BAS, for integrating up to 2 wired detector zones into the system BUS
- Easily connect up to 2 conventionally wired, individually identifiable detectors to the alarm control unit system BUS anywhere in the building
- Ultra-flexible installation in a standard switch box (55 mm diameter) anywhere in the building, in direct proximity to the wired detectors in the respective room (e.g. office)
- Decentralized wiring of the detectors without complex individual wiring saves cable length and installation time
- Individual configuration for each I/O module during installation, e.g. wiring type (CC or FSL), setting the cable lengths, etc.
- Detector wiring is easy to install and maintain, fixes practically in place, with 7-segment display, e.g. for address display, error codes or localization of individual modules via buzzer
- Compatible with a wide range of wired detectors such as motion detectors/PIR sensors, glass breakage and smoke detectors, emergency call buttons, and door contacts
- Integrated relay output for simple control of building automation (e.g. light, roller shutters, electronic door opener)
- Protected installation in permanently sealed switch box, incl. cover/tamper contact

Number of wired detector groups	2
Number of wireless detector groups	0
Zone closure	CC/FSL
Sabotage monitoring	Yes
Connections	RS485 BUS, 2 wire detector zones, 1 relay output, Buzzer
Integrated siren	No

WIRELESS COMPONENTS

By selecting radio detectors, mechatronic wireless window/door locks and wireless sounders, you can put together your own individual alarm system. In addition to the alarm components, you supplement the system with the valuable protection provided by hazard detectors such as wireless-networked smoke detectors (protection against smoke poisoning) or water detectors.

The wireless detectors and sirens are easy to install and programmed into the control panel or wireless extension without pulling cables. When using detectors with Secoris radio standard, a secure encrypted wireless connection (AES-128 standard as used in online banking) is provided. The mechatronic detectors also function as robust mechanical security devices for maximum burglary protection.

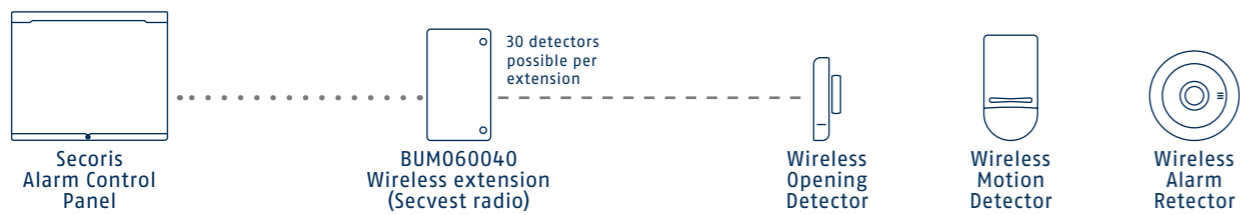

Depending on the project plan (e.g. radio extension, hybrid module), wireless components are the optimal supplement for hybrid alarm systems. For example, at installation sites where wiring is highly complex, special features (e.g. mechatronic protection) are required or time-limited protection is intended.

Flexible positioning, quick installation: Whether wireless detectors or signalling devices for the Secoris hybrid system or standard wireless components for the Secvest.

SYSTEM EXTENSION

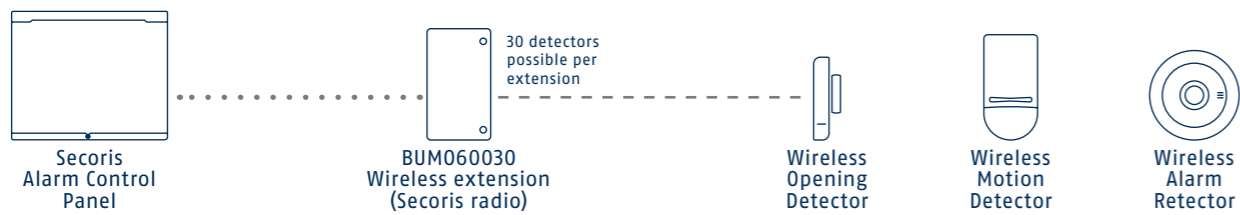

WIRELESS COMPONENTS

SECVEST WIRELESS PRODUCTS COMPATIBILITY WITH BUM060040:

The Secoris BUS wireless extension BUM060040 creates the bridge to the radio detectors, mechatronic window handles/door locks and other wireless components of the Secvest. To upgrade an existing system from Secvest to Secoris, only the control panel is replaced and the wireless extension is installed. Existing wireless components simply continue to work with the Secoris system.

SECORIS WIRELESS PRODUCTS COMPATIBILITY WITH BUM060030:

The Secoris BUS wireless extension BUM060030 integrates wireless detectors and other wireless components into the Secoris intrusion alarm panel. Signals are transmitted via the secure Secoris radio system with convenience functions, making installation and maintenance of the wireless components simple.

Description	Secoris wireless remote control
	<ul style="list-style-type: none">• Compatible with Secoris intrusion alarm system (BUM060030) and Secvest alarm system (FUAA50xxx)• 3 function keys „Arming“, „Disarming“ and „Status query“• 1 freely programmable key, e.g. for internal setting or activation of a switching output, etc.• 8 coloured status LEDs for clear display and current status feedback• A hold-up alarm can be deliberately triggered via key combination• Wireless connection in Secoris wireless mode AES128-encrypted and replay-protected• Compact remote control for trouser pocket and key ring (incl. lanyard)• Firmware with OTA update capability (over-the-air remote maintenance)• Battery life: up to 3 years• EN 50131 Grade 2 certified
Compatible with	Secvest, Secoris
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	ABS
Dimensions (W × H × D)	36 x 17 x 62 mm
Scope of delivery	1 x Wireless remote control • 1 x Batterie CR2450 3 V Li-Mn (FU2987) • 1 x Manual • 1 x ABUS lanyard
Required accessories	-

Item number FUM060010

Description	Secoris wireless repeater (signal amplifier)
	<ul style="list-style-type: none">• Additional module to increase the range and amplify the signal of Secoris wireless components• Enables good wireless accessibility anywhere in the building• Opens up rooms, parts of buildings and outdoor areas for wireless operation that would otherwise be unsuitable due to long distance to the Secoris wireless extension or shielding building structure• Amplifies the signal for max. 10 Secoris wireless components• Automatic transmission of the wireless components to the repeater• Coloured LEDs for status display and indication of signal strength (range)• Wireless connection in Secoris wireless mode AES128-encrypted and replay-protected• Firmware with OTA update capability (over-the-air remote maintenance)• EN 50131 Grade 2 certified
Compatible with	Secvest, Secoris
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	ABS
Dimensions (W × H × D)	130 x 155 x 42 mm
Scope of delivery	1 x wireless repeater • 2 x batteries • 1 x Installation manual • 3 x Screw, plug
Required accessories	AZZU10011 International Switching-Mode Power Supply 12 V/1.5 A (Cord)

Item number FUSG60100

Description	Secoris wireless outdoor siren with flashing light (combined signal transmitter)
	<ul style="list-style-type: none">• Combined signal transmitter for alerting by means of siren (acoustic) and LED flashing light (visual)• Loud alarm siren (> 100 dB(A) at 1 m) for outdoor use• LED flashing light (red) visible from afar, coloured LED display of wireless signal strength and other functions• Simple, wireless integration into the Secoris control panel (via wireless extension BUM060030), flexible choice of installation location thanks to high wireless range (battery life up to 2 years)• Device settings at the control panel (Secoris wireless): Arming confirmation, jamming detection, signal tone adjustment, siren duration; at the siren via jumper (Secvest wireless)• Quick 1-hand installation thanks to fixed front flap and integrated spirit level, optimised tear-off contact (sabotage monitoring) can be adapted to any wall surface• Firmware with OTA update capability (over-the-air remote maintenance)• Compatible with Secoris (BUM060030) and Secvest (FUAA50000, FUA50500 and higher)• Wireless connection in Secoris wireless mode AES128-encrypted and replay-protected• EN 50131 Grade 2 certified
Compatible with	Secoris, Secvest
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	PC/ASA
Dimensions (W × H × D)	210.6 x 294 x 78.5 mm
Scope of delivery	1 x Wireless Outdoor Sounder • 1 x Alkaline battery pack 2 x 3 V (FU2986) • 1 x Mounting material • 1 x Quick Guide
Required accessories	-

Item number FUSG60110

Description	Secoris wireless indoor siren (acoustic signal transmitter)
	<ul style="list-style-type: none">• Signal transmitter for alerting by means of siren (acoustic)• Loud alarm siren (> 80 dB(A) at 1 m) for indoor use• Simple, wireless integration into the Secoris intrusion alarm control panel via the wireless extension (BUM060030)• Wireless siren is easy to install or retrofit without cables, wireless signal repeatable for bridging long wireless distances• Firmware with OTA update capability (over-the-air remote maintenance)• Tamper monitoring (cover and wall tear-off contact)• Battery operation (up to 2 years) or external power supply (6-15 V DC, power supply unit optional)• Compatible with Secoris (BUM060030) and Secvest (FUAA50000, FUA50500 and higher)• Wireless connection in Secoris wireless mode AES128-encrypted and replay-protected• EN 50131 Grade 2 certified
Compatible with	Secoris, Secvest
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	PC / ABS
Dimensions (W × H × D)	130 x 154 x 40 mm
Scope of delivery	1 x Wireless internal siren • 4 x batteries • 1 x Quickstart guide • 3 x Screws, Wall Plugs
Required accessories	-

WIRED COMPONENTS

Maximum flexibility: Efficient wired detectors and wired sounders (outdoor and indoor sirens) work with the hybrid-capable ABUS intrusion detection and alarm systems Secoris, Terxon and Secvest, depending on the configuration (e.g. hybrid module).

A wide range of different detector types is available for the many hazards of everyday life. The VdS-certified detectors in the ABUS range provide a very high level of protection against tampering. Automatically secure: VdS-certified locking elements of Secoris protect users against triggering false alarms by entering secured areas (armed Intruder Alarm System).

Motion detectors, for example, monitor entire rooms. Opening detectors trigger an alarm when windows and doors are opened, the system is armed and no one is at home. Glass breakage detectors and shock sensors detect intrusion via broken windows, glass doors, drywall, etc.

In United Kingdom and various European countries, smoke alarms are required by law in private living spaces and must be installed in commercial buildings in accordance with the respective fire protection regulations (fire protection concept/building permit). The wired smoke sensors can be integrated directly into the alarm system for even greater security and convenience.

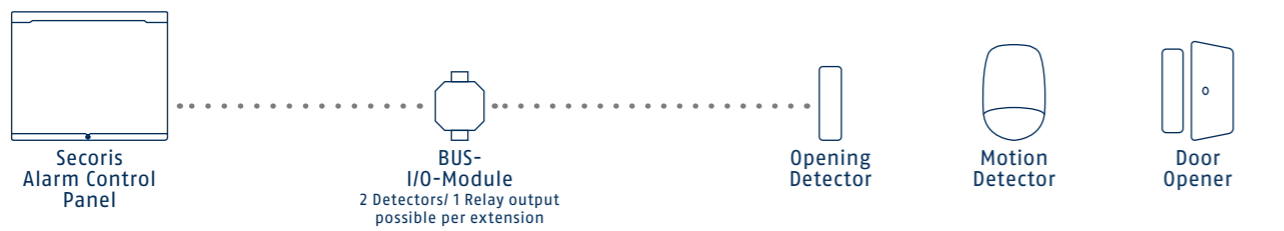

Components such as light barriers are recommended for monitoring entrances, for example.

Ideal for commercial properties: connect wired detectors quickly and easily via the system bus. Efficient and low-maintenance.

SYSTEM EXTENSION

WIRED COMPONENTS

SECORIS WIRED COMPONENTS E.G. WITH BUM060020

With the mini module, wired detectors can be placed anywhere in the building and simply connected to the system bus. The module with integrated relay output fits into a switch box (55 mm), which is installed next to the detectors. This saves cable runs and labour time during installation.

ARMING DEVICES

Convenience and safety when arming/disarming the alarm system. Quite easy to do directly at the front door when closing or opening via access control system (commercial building), door fitting with PIN code access or separate wireless cylinder (private household). In addition to the high level of operating convenience, this also enables forced arming/disarming of the intruder alarm system in order to avoid entering secured areas and to reduce any false alarms to a minimum.

That is why professional ABUS alarm systems can be easily integrated into an access control system or coupled with a wireless door cylinder. With the ABUS systems listed here – or, depending on the project plan, with an existing system in the property.

WAPPLOXX PRO PLUS

- Radio-based, online-capable locking/access control system
- Up to 160 wireless door components for flexible, wireless installation
- 2 intruder alarm systems or security zones can be integrated
- Arming/disarming the intruder alarm system at the wireless cylinder
- Centralised software for all components, intruder alarm systems and cameras

EL & ELT

- Wired electronic door components with chip key reader
- EL: discreet wall reader for operation using a chip key
- ELT: Input unit can be operated with chip key and PIN code
- Control of e-door openers, motorised locks, lifts, etc.
- Arming/disarming of the intruder alarm system at the door component

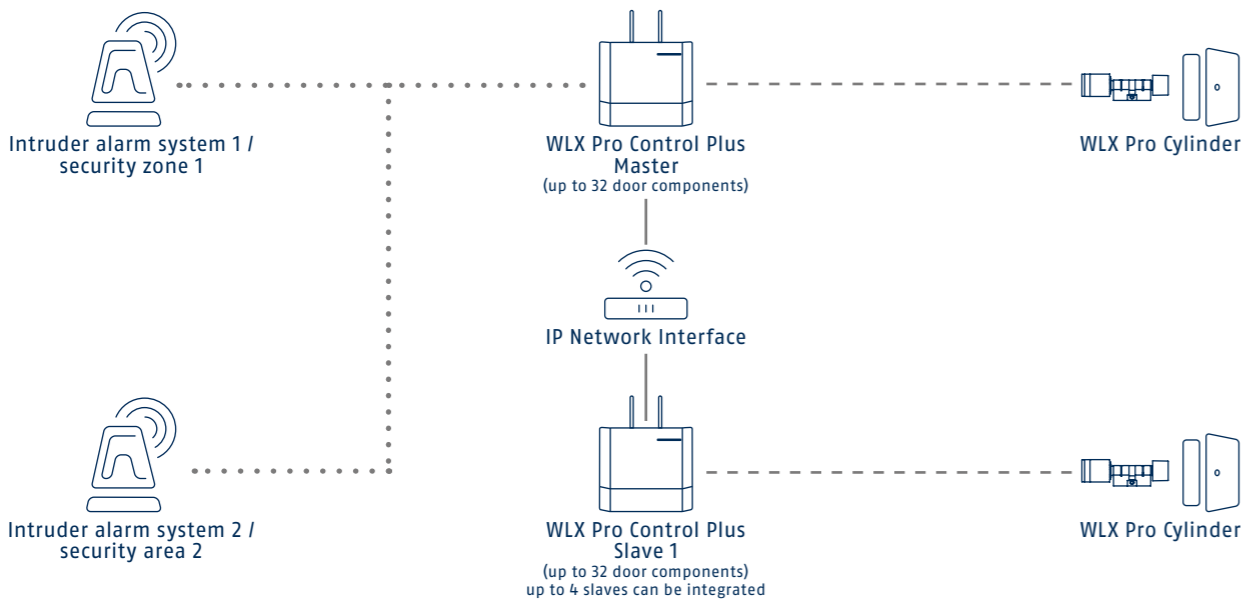

Convenient & professional: forced arming/disarming of the intruder alarm system directly at the door protects against false alarms and offers optimum operating convenience.

TRANSMISSION

Any alarm chain is only as strong as its weakest link. The fast and reliable transmission of the alarm notification to the occupants, owners or managers of the building is absolutely crucial.

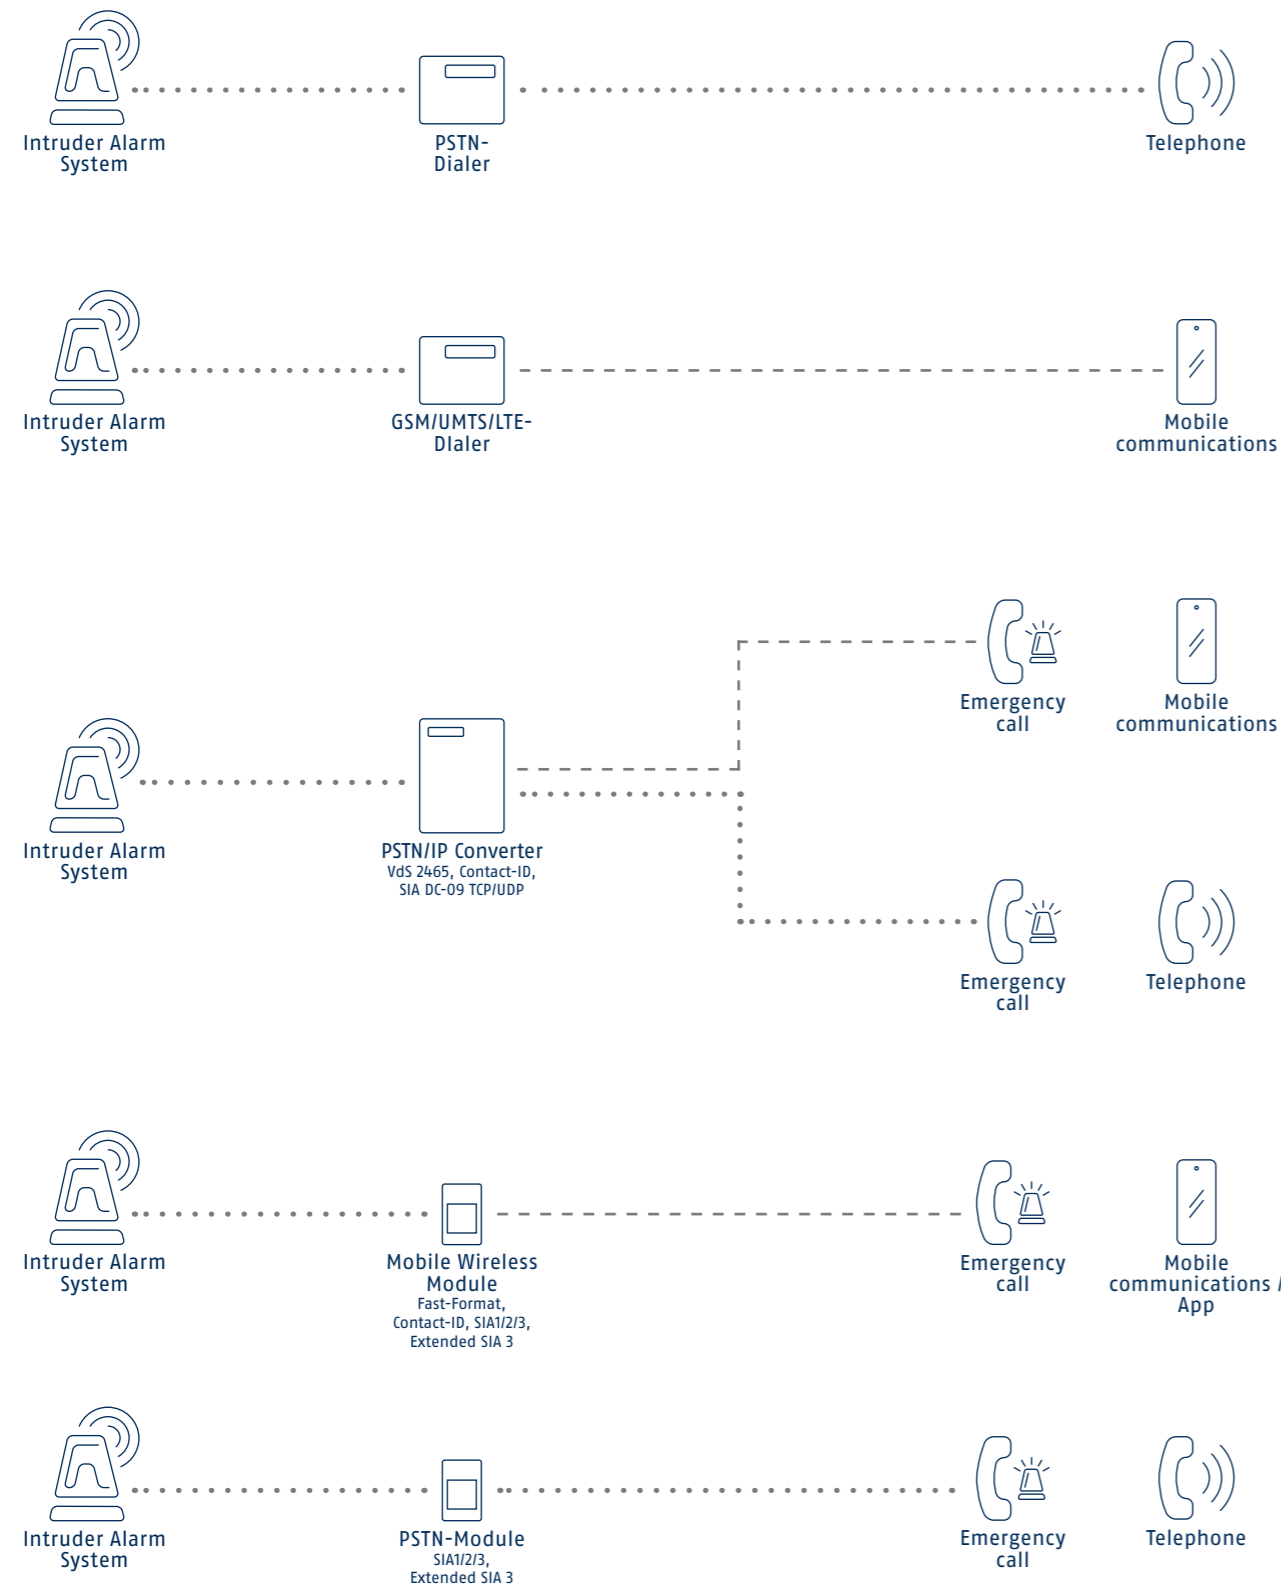

In addition to the local alarm on the property, the immediate alarm via e-mail or app is an important part of the alarm chain. Additional security is provided by a (possibly intentionally redundant) alarm via the fixed or mobile network.

When securing high-value homes and commercial properties, a professional guard and security service should usually also be alerted, primarily by transmitting the alarm notification via digital protocols to an alarm receiving centre (ARC). Depending on the system's programming, a silent alarm (without local alarm) can also be transmitted.

Silent if necessary: if the external alarm with loud external siren is not desired or sufficient in the building, the remote alarm is sent to stored telephone numbers or emergency call and service centres. If required (e.g. network failure) also via a mobile network.

ACCESSORIES

Matching accessories make the difference: clearly visible warnings, batteries and accumulators, distributors for clean installation and much more.

Draw the attention of customers, employees and passers-by to your alarm security system with warning stickers - and thus directly deter potential offenders.

On the following pages you will also find the appropriate accessories for clean installation and stable operation of the alarm system.

Small but extremely practical: accessories for professional installation, expert maintenance and identification of the security zone.

SERVICE & CONTACT

INTERNAL AND FIELD SERVICE

As a specialist dealer partner, you can benefit from your own, dedicated team of representatives for your region. Our team will be available to support you with comprehensive, specialist expertise no matter what you need. This of course also covers any questions relating to your project, so you can count on both our internal support office and our on-site field service.

THE ONLINE STORE

Take advantage of the quick and easy ordering process at www.abus.com

Your user account is where you can conveniently carry out all of your orders and track your order status in real time. This is also where we provide comprehensive information and sales support documents for your convenience.

TECHNICAL SUPPORT (TS)

If problems occur with our products, our technical support team is ready to take your call to find the source of the issue and work with you to find a solution. And when on-site assistance is required, our technical field service representatives are always on hand.

QUALITY ASSURANCE – SERVICE – PRODUCTION (QSP)

In the event of a technical defect, our QSP department will perform a thorough check of your device and repair or replace it immediately if possible.

PLANNING SUPPORT

Are you planning a new building or a larger property? We offer you knowledgeable planning support incl. tender data, calculation tools, etc.

PLANNING DEPARTMENT	DE 
	+49 82 07 959 90-400
	planung@abus-sc.com

We are always there for you: when ordering, for advice, for technical questions or for your complex electrical planning.
